EZ School Registration

“The education system requires a tremendous amount of data and documentation, and this solution (EZSR) allows us to focus less on processing paperwork and more on what matters most — meeting the educational needs of our students. We now have a **cost-efficient, secure registration process that allows for easy access to student files.”**

**Steve Keyhayes, IT Director, West Orange
School District NJ: June, 2008**

“After we adopted the original technology, we returned to SRC looking for ways to streamline our system even more, they suggested adding the EZSR components that include automated notification and document trailing. **The time savings and improved communications are invaluable.”**

**Steve Keyhayes, IT Director, West Orange
School District NJ: May, 2009**

NEW ORLEANS SCHOOLS Recovery School District

Smooth Opening Is Job One in New Orleans

By Leslie A. Maxwell

New Orleans

Today is the first day of school for more than 13,000 children enrolled in the Recovery School District, the state-run system that took over most of this city's public schools in the months after Hurricane Katrina hit two years ago.

It will be a homecoming of sorts for many students, who will be back in classrooms in their native city for the first time since the storm devastated New Orleans and scattered thousands of families across the country. And it will be a test for the new education leaders here, who have promised, at the very least, to avoid last year's chaotic opening weeks by delivering well-equipped classrooms, ample numbers of teachers, hot lunches, and clean restrooms in the 34 schools the recovery district is running this academic year.

RSD officials have been scrambling for weeks to be ready. One of their biggest challenges—recruiting and hiring teachers—has been conquered.

"We are fully staffed and, in fact, we are at 130 percent," Paul G. Vallas, the superintendent of the Recovery School District, said last week. "We were able to hire teachers who are more than warm bodies."

But last Wednesday, just six days before opening day, there were still mini-crises to address and countless questions to answer.

What time would the high schools start? Would an elementary school in New Orleans East—one of seven modular campuses to open this year in the most wrecked neighborhoods in the city—pass the fire marshal's inspection for occupancy? Were there enough volunteers to hang numbers on classroom doors at another modular campus? Had every teacher hired by the district received his or her class assignments?

Last week, parents were continuing to line up inside the Recovery School District's cramped headquarters in the Upper Ninth Ward to register their children—at a clip of 150 or so a day.

Inside the 'War Room'

City schools registration described as 'nightmare'

Late applicants face long wait in stuffy room

By Matt Brown

While thousands of new teachers and classrooms have been ready for months, the city's public schools are still struggling to get ready for the start of the school year.

The registration process for many parents who would spend the last months of the summer waiting for their children to start school was anything but smooth. Many parents were waiting in long lines for hours, only to find out that their children were not accepted for the school year.

Gene Wolfe and her son, Patrick, arrived Tuesday to register their son for the start of the school year.

School registration tough at last minute

Late registrants in the Scranton School District described the process as "horrible" and a "nightmare," faced with a long wait in cramped quarters. District Chief Executive Michael Sheridan said notice had been given that parents had 10 weeks to register students.

Parents who had to register their children at the last minute were often told that they would not be accepted for the school year. This was especially true for parents who had waited until the last few days of the registration period.

Parents who had to register their children at the last minute were often told that they would not be accepted for the school year. This was especially true for parents who had waited until the last few days of the registration period.

The Challenges of Student Enrollment

Registration Challenges:

- **Time Consuming**
Manually transcribing to multiple systems, 2+ hours / student
- **Paper Intensive Process**
- **Expensive**
- **Compliance: Risk of Litigation**
FERPA & HIPAA exposure (\$146.5 M spent on litigation in 1999-2000 and case studies indicate constant increases)
- **Disaster Recovery Costs**
- **Misappropriation of Federal Funding**
Inaccurate records = lost funding

What EZSR Brings to Registration

EZSR Value:

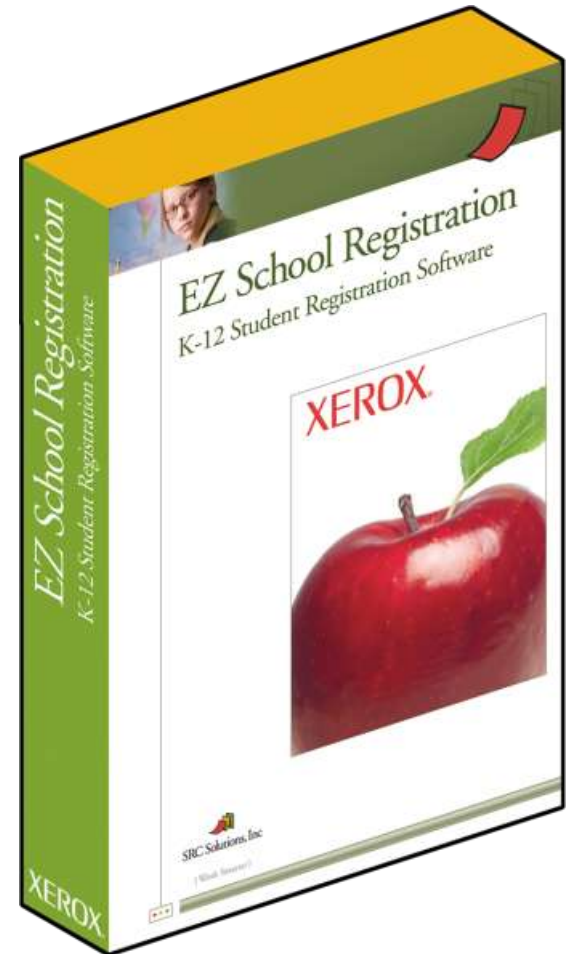

- **ROI**
Registration cost of \$161.10 per student is reduced to \$41.18 per student. Total savings of \$1.1 M over 4 years for a typical school with enrollment of 10k students [West Orange School District](#) EZSR pays for itself in as little as half a year.
- **Cost Reduction / Increased Efficiency**
Reallocate human hours, eliminate storage and back up costs, reduce supplies costs
- **Risk Abatement**
All SIF requirements, HIPAA and FERPA standards are met
- **Guaranteed Authenticity (Surety Absolute Proof®)**
- **Disaster Recovery and Avoidance**

What do you get with EZ School Registration?

- **Flexible secure platform for 2 way communication with guardians to gather information, update information, schedule appointments.**
- **Document mgmt configured to meet your needs**
- **Data, document, and media gathering in an efficient, secure process**
- **EZSR is **Green****
- **Automated Archival**
- **Ability to accommodate multiple languages**
- **Total Security**
- **Trailing Document Management**

Typical Implementation Schedule 60-90 days

- **Whiteboard project scope – via webinar**
- **Proposal**
- **Contract signing**
- **Map current process with SRC**
- **Arrange for hardware / hosting**
- **On site implementation by SRC solutions**
- **On Site Training of key personnel**
- **Official Start up date**
